

2006 CRIME REPORT

SAINT PAUL

POLICE DEPARTMENT

CHIEF JOHN M. HARRINGTON
SAINT PAUL, MINNESOTA

PREPARED BY RESEARCH AND DEVELOPMENT

Introduction

The Saint Paul Police Department crime report serves as the primary description of citywide crime statistics. The 2006 crime report is similar in nature to the format of the 2005 crime report containing sections describing police calls for service, *part I and selected part II offense graphs, part I and selected part II offenses by planning districts, planning district maps, arrest demographic information, an appendix showing citywide crime maps, and an appendix listing part I offenses by grid.

The 2006 crime report is primarily derived from the data sent to the Minnesota Bureau of Criminal Apprehension as part of the FBI Uniform Crime Reporting (UCR) system. The 2006 crime report follows the FBI UCR system of reporting which requires police departments to report homicide, rape, and aggravated assault totals as the number of victims not the number of events. Motor vehicle theft totals reflect the number of vehicles stolen. All other offense totals (robbery, burglary, theft, and arson) are reported by event not victims.

The 2006 crime report is available for viewing and printing on the Internet at **<http://www.ci.stpaul.mn.us/police>**. Permission is granted to print, copy, or distribute individual sections of the crime report as long as the general introduction and section introduction pages corresponding to the selections are printed, copied, and distributed with them. Questions regarding the crime report can be answered by the research and development unit at 651-266-5501.

* Part I offenses are defined by the FBI Uniform Crime Reports as homicide, rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Further definitions are provided on the title page preceding each section.

Reported Offenses

Offense totals consist of calls for service where an official report is filed with the Saint Paul Police Department.

Homicide, rape, and aggravated assault offense totals are recorded in accordance with UCR guidelines, counting the number of victims not the number of crime events. All other Part I crime offenses report the number of events, not victims. If a report is written for a person who committed three offenses, the crime event will be categorized under the incident code of the most serious offense.

Actual and reported offenses are required to be sent to the Minnesota Bureau of Criminal Apprehension and are displayed on page four. Reported offenses are used for comparative purposes on pages 8-16. Part II offense totals may not reflect corrections made to classifications as a result of investigation pursued after the initial report.

2003/2006 Part 1 Actual Offenses

* Totals reflect actual offenses, not reports written.

Planning District Council Reports

The City of Saint Paul is divided into 17 separate planning districts. There are 202 police grids that further divide Saint Paul. All district council statistics are derived from Saint Paul police grid statistics. Saint Paul police grid boundaries do not align with the exact planning district boundaries. As a result, a crime in one district may occasionally be reported in another. The map in the following pages, titled 'Saint Paul City Planning Districts by Grid', graphically displays each planning district and its corresponding grid numbers.

Crime statistics were derived from Saint Paul 'reports written' in specified planning districts. Totals may or may not match totals in the rest of the crime report. If a report did not have a designated planning district, it is not included.

This section also supplies planning district population data. The United States Census Bureau supplies Saint Paul population data by census tract block, not by planning districts. The map 'Saint Paul Planning District Population Boundaries' displays population by planning district, using the census block tract data as boundaries. Census tract blocks do not align with the exact boundaries of the planning district boundaries. For this reason, population data reported for each district is not exact. Planning District population totals were compiled by the Wilder Research Center*.

Appendix II

Part I Offenses by Grid

Each grid contains a count for each part I offense. Totals for homicide, rape and aggravated assault indicate the number of victims per grid as defined by the BCA. Motor vehicle thefts reflect the number of vehicles stolen.

All other part I offense (robbery, burglary, theft, arson) totals reflect the number of events not victims.

Mean is calculated by dividing Total by number of grids with residents.

Med = Median. Median represents the midpoint of all grid totals.

1990 population by grid was used and the data was obtained from the Wilder Research Center.
