Re: Edgcumbe Road Reconstruction Project – Postponed Until 2023

Greetings,

Edgcumbe Road from St. Paul Avenue to Hampshire Avenue was originally scheduled to be reconstructed this summer.

Due to unforeseen supply chain issues with materials, including piping, the Edgcumbe Road Reconstruction project scheduled for 2022 is being rescheduled for 2023. This reconstruction project has underground water and sewer main work along the roadway. Public Works reviewed the schedule of work and construction impacts to the area, and then made the decision to postpone the project until 2023, which will minimize construction disruptions and allow it to be completed in one construction season.

In addition, Ramsey County is scheduled to do a resurfacing and lane reduction project on St. Paul Avenue from Cleveland to Edgcumbe in 2022. The Edgcumbe Road project delay will allow Ramsey County to complete their scheduled work in the area this year, keeping the overall traffic disruption to a minimum.

Public Works will provide additional information to property owners next year in the spring with schedules and updates as they become available.

For this year, Public Works will continue to pothole patch and maintain the road as much as possible.

For project information, please visit the website at www.stpaul.gov/edgcumberoad.

If you have additional questions, please contact project engineer, Barb Mundahl at 651-266-6112 or Barbara.mundahl@ci.stpaul.mn.us.

Thank you,
Saint Paul Public Works
