

Kellogg-Third Street Bridge Project Road Closure and Bridge Construction starts Summer 2024

June 12, 2024

What is happening?

Kellogg Boulevard, between Broadway Street and Mounds Boulevard, will be closed for bridge reconstruction starting in summer 2024. The exact start date will be posted on construction signs and the project website (stpaul.gov/Kellogg-3) in advance of the closure.

When is this happening?

Construction is scheduled to start in summer 2024 and is anticipated to take approximately three years.

Learn more: Virtual meeting on Wednesday, June 26

Project staff will share a short presentation and answer questions.

Wednesday, June 26

5:30 p.m. – 6:30 p.m. (10-15 minute presentations at 5:30 p.m. and 6:00 p.m.)

To join online via Microsoft Teams: visit stpaul.gov/Kellogg-3 and click the meeting link

To call in (audio only): call 612-315-7905 and enter conference ID 647 940 042#

Project impacts

Traffic Impacts

- Kellogg Boulevard will be closed for approximately three years.
- Vehicles will be directed north to East 7th Street. *See included map for details.*
- Traffic delays should be expected.

Pedestrian and Bike Impacts

- Pedestrian and bikes will be directed south on Mounds Boulevard to Commercial Street and 4th Street.

Business Access

- Parking lots, buildings, and Union Depot will remain accessible during construction from Lowertown on the west side of the bridge. *See included map for details.*
- Owners and tenants immediately adjacent to the work site will receive separate notices during specific work activities that may affect their property.

Why will the project take so long?

Kellogg-Third Street Bridge is the longest city-owned bridge, and this project is the city's largest undertaking since 1995 when the Wabasha Bridge was constructed over the Mississippi River. Other project complexities include:

- Multiple road crossings, including Interstate 94.
- Active operation of railroad tracks under the bridge. The track junction is one of the busiest in the Midwest.
- Commercial Street, under the bridge, must remain open during construction to provide access to critical power and sewer facilities.
- Underground utility tunnels, some exceeding 12 feet in width, require special protection and work methods.
- The project site is subject to flooding from the Mississippi River.

Will my property be assessed?

Private property will not be assessed to pay for the bridge. The project is funded from federal, state, and local sources.
