

# WELCOME

## Saint Paul ADA Transition Plan

[stpaul.gov/ADAplan](http://stpaul.gov/ADAplan)

**SAINT PAUL**  
MINNESOTA

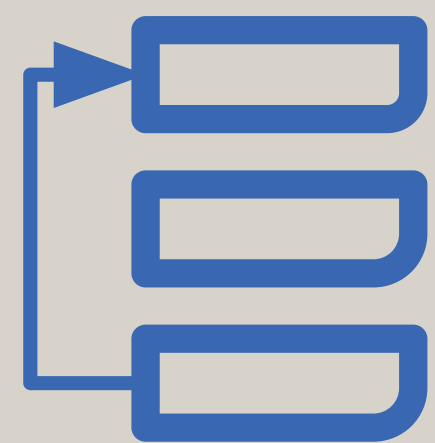

# Project Overview

The city is working on a transition plan to better comply with the Americans with Disabilities Act (ADA)

This Plan will outline how the city will prioritize Public Works investments

Other departments will also complete ADA transition plans

Plans will cover our facilities but also our services, programs, policies and communications

# ADA Infrastructure Needs and Improvements

## NEEDS

Narrow, uneven ramps

Inconsistent sidewalks

Obstructions in the middle of pathways

Broken, uneven sidewalks

## IMPROVEMENTS

Updated sidewalks

Safe slope for ramp from sidewalk to crosswalk

Updated crossing ramps and signage

Pedestrian crossing signals that work for people with low vision

# Equity Approach Overview

- The equity analysis links community engagement and ADA field evaluation to inform prioritization
- Using 3 years of ADA complaint data to inform two critical plan components:
  - Initial engagement
  - Prioritization
- This approach also builds off of the City of Saint Paul's pedestrian priority plan
- Building off the City of Saint Paul's pedestrian priority plan

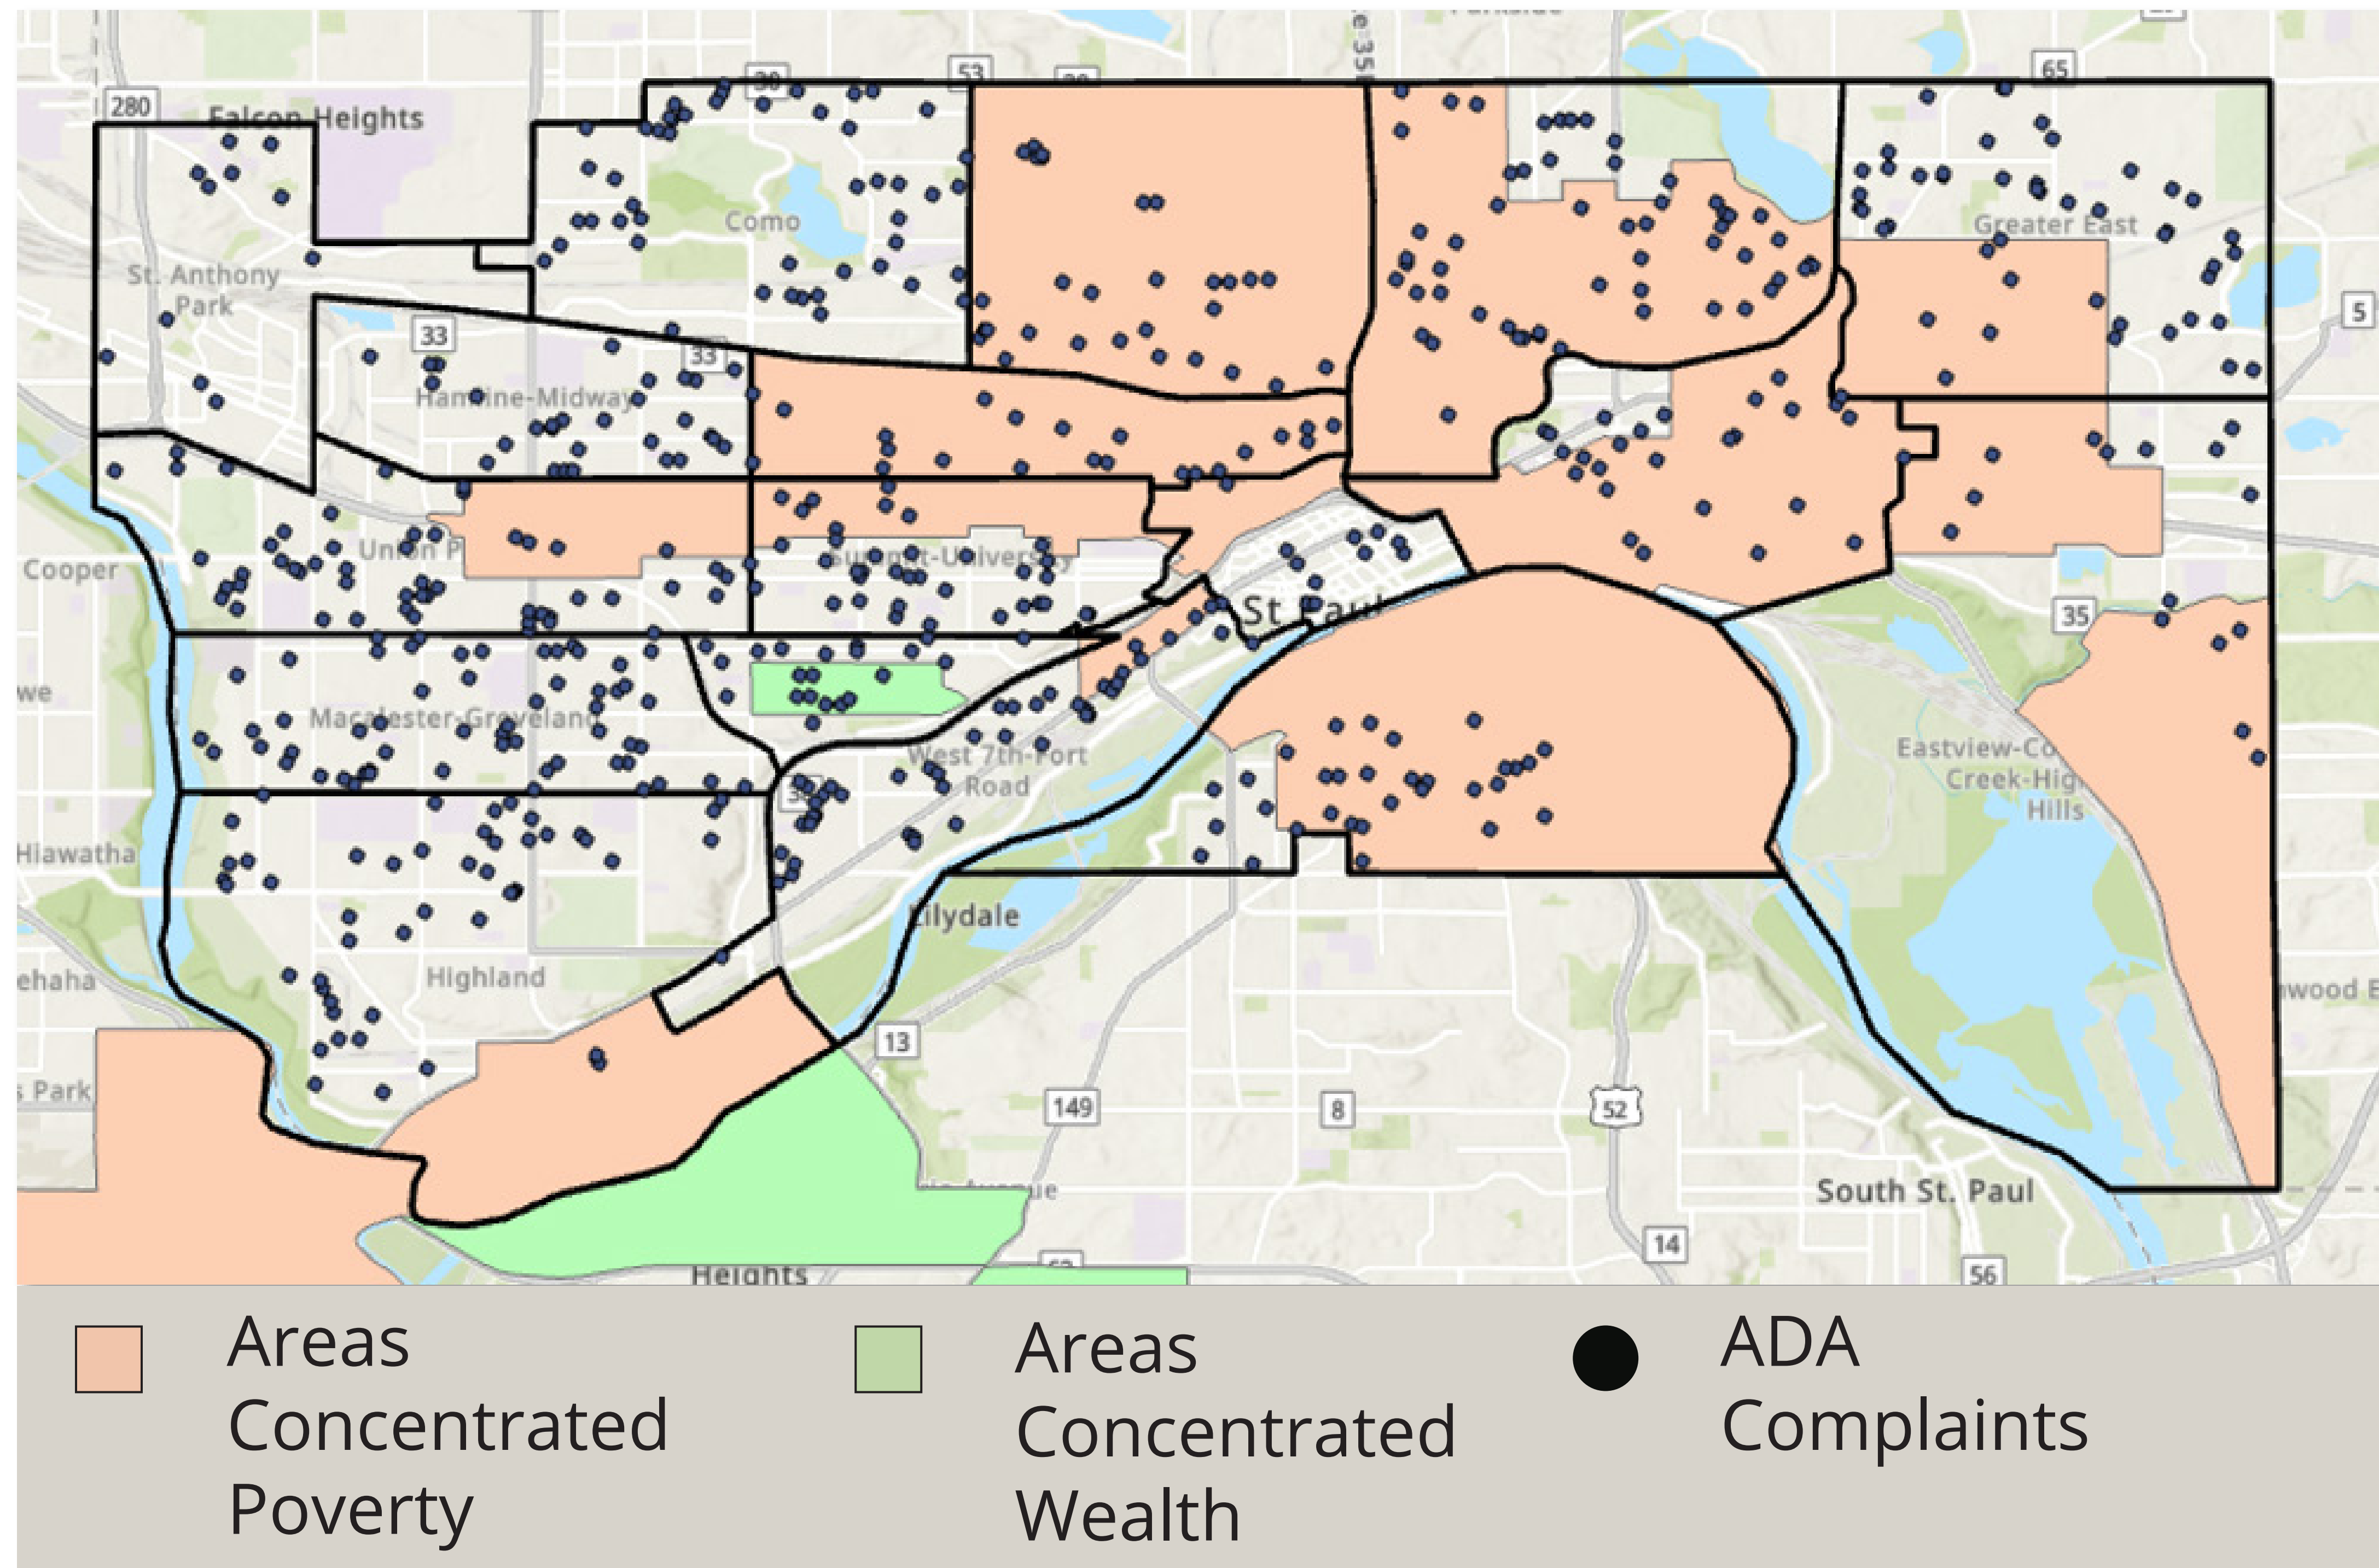

Priority = Accessibility + Equity

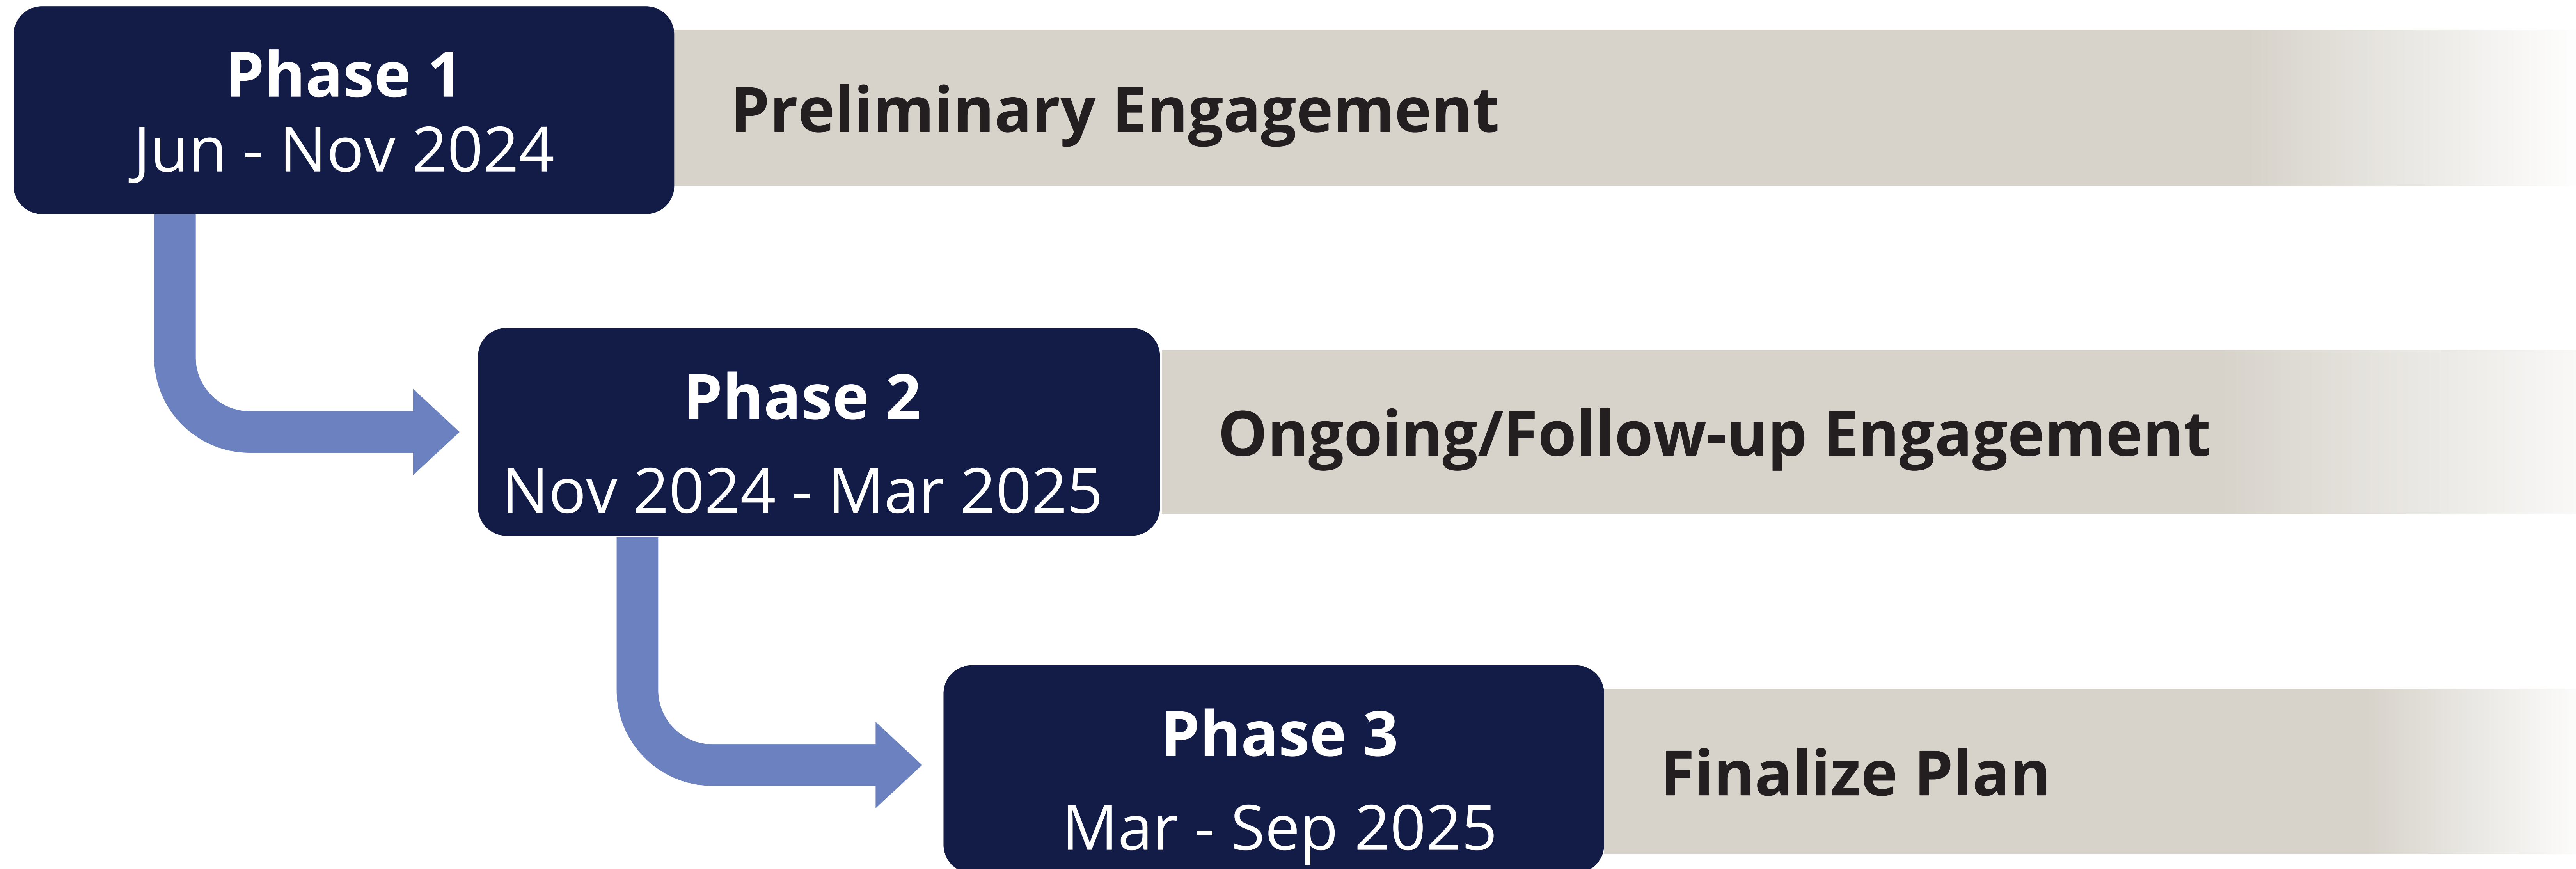

# Equity Approach: Engagement

We are looking at:

- Complaints per capita
- Complaints in high pedestrian priority areas
- Percentage of diversity compared to citywide demographics
- Disability status
- Concentrated poverty and affluence
- This will produce an equity score, which will help us understand where to prioritize ADA investments
