DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52152-1

Lab Section	Qualifier	Description
GC/MS VOA		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC Semi VOA		
	F1	MS and/or MSD Recovery is outside acceptance limits.
	E	Result exceeded calibration range.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits

Minneapolis, MN US 55401

CADENA project ID: E200572
Project: FORD-Twin Cities Assembly Plant
Project number: DE000372.0003
Laboratory: TestAmerica - North Canton
Laboratory submittal: 52152-1
Sample date: 2015-06-16 2015-06-17
Report received by CADENA: 2015-06-30
Initial Data Verification completed by CADENA: 2015-07-01

The following minor QC exceptions or missing information were noted:

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

GCMS SVOC CCV response outliers as noted in the laboratory submittal case narrative were not used to qualify results as part of this level 2 verification review.

GCMS VOC QC batch 185863 did not include MS recovery data due to insufficient sample volume available for creating MS/MSD's according to laboratory submittal case narrative.

GCMS VOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client sample -001.

GCMS VOC QC batch 185863 method blank had a detection below the RL for toluene. Client samples -003 and -005 toluene results should be considered to be non-detect at the RL and qualified with UB flags.

GCMS VOC QC batch 185863 and PCB QC batch MS recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

GCMS SVOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client samples -001 and -002.

GCMS SVOC QC batch 185853 method blank had detections below the RL for bis-2-ethylhexylphthalate and di-n-butylphthalate. Client samples -001, -002, -003, -004 and -005 bis-2-ethylhexylphthalate and sample -001 di-n-butylphthalate results should be considered to be non-detect at the RL and qualified with UB flags.

PCB sample -001 surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results.

Metals method blanks had detections below the RL in QC batch 185893 for chromium, magnesium and zinc and in QC batch 186561 for barium, calcium, chromium, copper, iron, magnesium, manganese, nickel, potassium, arsenic, lead and zinc. Metals results should be considered to be non-detect at the RL and qualified with UB flags for the following samples and analytes:
CHROMIUM, COPPER, POTASSIUM AND ARSENIC - UB flags - -001, -002, -003, -004 and -005.
IRON - UB flags - -002 and -005.
LEAD - UB flags - -004 and -005.
ZINC - UB flags - -003 and -004.

Metals sample -001 solid matrix MS/MSD recoveries were outliers biased high for magnesium. Client sample -001 solid matrix magnesium results should be considered to be estimated and qualified with J flags. Recoveries for aluminum, antimony, cadmium, calcium, cobalt, copper, iron, manganese, barium, lead and zinc were not considered to be statistically reliable so were not used to qualify results due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule).

Metals sample -001 SPLP/TCLP matrix MS/MSD recoveries for zinc were not considered to be statistically reliable so were not used to qualify results due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule). MS or MSD recoveries but not both were outliers biased low for calcium, iron and lead so qualification was not required based on these QC outliers alone. MS and MSD recoveries were outliers biased low for mercury so client sample -001 leachate matrix mercury results should be considered to be estimated and qualified with a J flag if detected or UJ flag if non-detect.

6 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, PCB, GC VOC, GC Other, Metals and General Chemistry parameter(s).

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, MS/MSD Recovery, MS/MSD RPD, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52266-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT
The samples were received on 6/20/2015 10:30 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 2.6º C and 2.8º C.

TCLP VOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for TCLP volatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8260B. The samples were leached on 06/25/2015 and analyzed on 06/26/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3), ASB-1005_78-80 (20150618) (240-52266-4) and MB01 (20150619) (240-52266-5) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/22/2015 and analyzed on 06/23/2015.

Method(s) 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-186224 and analytical batch 240-186326 on these samples: ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3), ASB-1005_78-80 (20150618) (240-52266-4), and MB01 (20150619) (240-52266-5).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for TCLP semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8270C. The samples were leached on 06/28/2015, prepared on 06/29/2015 and analyzed on 06/30/2015 and 07/01/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 06/22/2015 and analyzed on 06/25/2015 and 06/29/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Hexachlorocyclopentadiene failed the recovery criteria low for the MS of sample 240-52269-15 in batch 240-186697.
Bis(2-chloroethyl)ether failed the recovery criteria high. Hexachlorocyclopentadiene failed the recovery criteria low for the MSD of sample 240-52269-15 in batch 240-186697. Refer to the QC report for details.

Samples ASB-1005_12-14 (20150618) (240-52266-1)[4X] and ASB-1005_37-40 (20150618) (240-52266-2)[2X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 8270C: The following sample was diluted due to the nature of the sample matrix: ASB-1005_12-14 (20150618) (240-52266-1). Elevated reporting limits (RLs) are provided.

Method(s) 8270C: The continuing calibration verification (CCV) associated with batch 186697 recovered above the upper control limit for 2,4-Dinitrophenol. The samples associated with this CCV were non-detect for the affected analyte; therefore, the data have been reported. The following samples are impacted: ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3), ASB-1005_78-80 (20150618) (240-52266-4), (240-52269-C-15-A), (240-52269-C-15-B MS), and (240-52269-C-15-C MSD).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3), ASB-1005_78-80 (20150618) (240-52266-4) and MB01 (20150619) (240-52266-5) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared and analyzed on 06/25/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 06/22/2015 and analyzed on 06/23/2015 and 06/24/2015.

Sample ASB-1005_12-14 (20150618) (240-52266-1)[2X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP METALS (ICP)
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for TCLP metals (ICP) in accordance with EPA SW-846 Methods 1311/6010B. The samples were leached on 06/28/2015, prepared on 06/29/2015 and 06/30/2015 and analyzed on 06/30/2015 and 07/01/2015.

Several analytes were detected in method blank LB 240-187116/1-B at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Copper and Nickel were detected in method blank LB 240-187116/1-D at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Barium, Lead and Potassium were detected in method blank MB 240-187231/2-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Zinc failed the recovery criteria low for the MS of sample ASB-1005_37-40 (20150618)MS (240-52266-2) in batch 240-187549. Calcium and Manganese failed the recovery criteria high. Calcium failed the recovery criteria high for the MSD of sample ASB-1005_37-40 (20150618)MSD (240-52266-2) in batch 240-187549. Refer to the QC report for details.

Sample ASB-1005_37-40 (20150618) (240-52266-2)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 3010A: The matrix spike and matrix spike duplicate (MS/MSD) were spiked post preservation due to re-prep of the batch: ASB-1005_37-40 (20150618) (240-52266-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL METALS (ICP)
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/24/2015 and analyzed on 06/25/2015.

Zinc was detected in method blank MB 240-186553/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Several analytes failed the recovery criteria low for the MS of sample ASB-1005_12-14 (20150618)MS (240-52266-1) in batch 240-186732. Aluminum, Barium and Iron failed the recovery criteria high. For the MSD of sample ASB-1005_12-14 (20150618)MSD (240-52266-1) in batch 240-186732, Antimony failed the recovery criteria low. Several analytes failed the recovery criteria high. Also, Calcium, Lead, Magnesium and Manganese exceeded the RPD limit. Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP MERCURY
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 06/28/2015, prepared on 06/29/2015 and analyzed on 06/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/24/2015 and 06/29/2015 and analyzed on 06/26/2015 and 06/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HEXAVALENT CHROMIUM
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 3060A/7196A. The samples were prepared on 06/29/2015 and analyzed on 06/30/2015.

Samples ASB-1005_46-50 (20150618) (240-52266-3)[5X] and ASB-1005_78-80 (20150618) (240-52266-4)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 7196A: The following samples were diluted for hexavalent chromium due to the nature of the sample matrix: ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TRIVALENT CHROMIUM
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for trivalent chromium in accordance with EPA SW-846 Method 7196A_CR3. The samples were analyzed on 07/01/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS
Samples ASB-1005_12-14 (20150618) (240-52266-1), ASB-1005_37-40 (20150618) (240-52266-2), ASB-1005_46-50 (20150618) (240-52266-3) and ASB-1005_78-80 (20150618) (240-52266-4) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/22/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52266-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	F1	MS and/or MSD Recovery is outside acceptance limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC Semi VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

CADENA project ID: E200572
Project: FORD-Twin Cities Assembly Plant
Project number: DE000372.0003
Laboratory: TestAmerica - North Canton
Laboratory submittal: 52266-1
Sample date: 2015-06-18 2015-06-19
Report received by CADENA: 2015-07-02
Initial Data Verification completed by CADENA: 2015-07-04

The following minor QC exceptions or missing information were noted:

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

GCMS SVOC CCV response outliers as noted in the laboratory submittal case narrative were not used to qualify results as part of this level 2 verification review.

GCMS VOC QC batch 186224 did not include MS recovery data due to insufficient sample volume available for creating MS/MSD's according to laboratory submittal case narrative.

GCMS SVOC QC batch 186070 MS recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

Metals method blanks had detections below the RL in QC batch 186553 for zinc and in QC batch 187231 for barium, calcium, chromium, iron, magnesium, manganese, potassium, arsenic, lead and selenium and in QC batch 187416 for TCLP copper and nickel. Metals results should be considered to be non-detect at the RL and qualified with UB flags for the following samples and analytes:
TCLP COPPER - UB flags - -002, -003.

Metals sample -001 solid matrix MS/MSD recoveries were outliers biased high for barium and biased low for antimony and biased high and low for calcium and biased low with the RPD also an outlier for lead and biased high with he MS/MSD RPD also an outlier for magnesium. Client sample -001 solid matrix antimony, lead, barium, calcium and magnesium results should be considered to be estimated and qualified with J flags. MS or MSD recoveries but not both were outliers for potassium and copper so qualification was not required based on these QC outliers alone. Recoveries for aluminum, iron, manganese were not considered to be statistically reliable so were not used to qualify results due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule).

Metals sample -002 MS/MSD recoveries were not considered to be statistically reliable so were not used to qualify results for calcium and manganese.

Metals sample -002 SPLP/TCLP matrix MS/MSD recoveries for zinc were not considered to be statistically reliable so were not used to qualify results due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule).

5 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, GC VOC, GC Other, Metals and General Chemistry parameter(s).

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, MS/MSD Recovery, MS/MSD RPD, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

SAMPLING AND ANALYSIS SUMMARY

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52267-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT
The samples were received on 6/20/2015 10:30 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.6° C.

TCLP VOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for TCLP volatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8260B. The samples were leached on 06/24/2015 and analyzed on 06/25/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1003_80-82 (20150617) (240-52267-1), ASB-1003_90-94 (20150617) (240-52267-2) and MB01 (20150618) (240-52267-3) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/22/2015 and analyzed on 06/23/2015.

Method(s) 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-186224 and analytical batch 240-186326 on these samples: ASB-1003_80-82 (20150617) (240-52267-1), ASB-1003_90-94 (20150617) (240-52267-2), and MB01 (20150618) (240-52267-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for TCLP semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8270C. The samples were leached on 06/28/2015, prepared on 06/29/2015 and analyzed on 06/30/2015 and 07/01/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 06/22/2015 and analyzed on 06/25/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Hexachlorocyclopentadiene failed the recovery criteria low for the MS of sample 240-52269-15 in batch 240-186697. Bis(2-chloroethyl)ether failed the recovery criteria high. Hexachlorocyclopentadiene failed the recovery criteria low for the MSD of sample 240-52269-15 in batch 240-186697. Refer to the QC report for details.

Method(s) 8270C: The continuing calibration verification (CCV) associated with batch 186697 recovered above the upper control limit for 2,4-Dinitrophenol. The samples associated with this CCV were non-detect for the affected analyte; therefore, the data have been reported. The following samples are impacted: ASB-1003_80-82 (20150617) (240-52267-1), ASB-1003_90-94 (20150617) (240-52267-2), (240-52269-C-15-A), (240-52269-C-15-B MS), and (240-52269-C-15-C MSD).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO

Samples ASB-1003_80-82 (20150617) (240-52267-1), ASB-1003_90-94 (20150617) (240-52267-2) and MB01 (20150618) (240-52267-3) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared on 06/23/2015 and analyzed on 06/24/2015 and 06/25/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO

Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 06/22/2015 and analyzed on 06/24/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP METALS (ICP)

Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for TCLP metals (ICP) in accordance with EPA SW-846 Methods 1311/6010B. The samples were leached on 06/28/2015, prepared on 06/29/2015 and 06/30/2015 and analyzed on 06/30/2015 and 07/01/2015.

Several analytes were detected in method blank LB 240-187116/1-B at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Copper and Nickel were detected in method blank LB 240-187116/1-D at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Barium, Lead and Potassium were detected in method blank MB 240-187231/2-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Calcium and Manganese failed the recovery criteria high for the MS of sample 240-52266-2 in batch 240-187366. Calcium failed the recovery criteria high for the MSD of sample 240-52266-2 in batch 240-187366. Zinc failed the recovery criteria low for the MS of sample 240-52266-2 in batch 240-187549. Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL METALS (ICP)

Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/24/2015 and analyzed on 06/25/2015.

Zinc was detected in method blank MB 240-186553/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Several analytes failed the recovery criteria low for the MS of sample 240-52266-1 in batch 240-186732. Aluminum, Barium and Iron failed the recovery criteria high. For the MSD of sample 240-52266-1 in batch 240-186732, Antimony failed the recovery criteria low. Several analytes failed the recovery criteria high. Also, Calcium, Lead, Magnesium and Manganese exceeded the RPD limit. Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP MERCURY
Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 06/28/2015, prepared on 06/29/2015 and analyzed on 06/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY
Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/24/2015 and analyzed on 06/26/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HEXAVALENT CHROMIUM
Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 3060A/7196A. The samples were prepared on 06/24/2015 and analyzed on 06/25/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TRIVALENT CHROMIUM
Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for trivalent chromium in accordance with EPA SW-846 Method 7196A_CR3. The samples were analyzed on 07/01/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS
Samples ASB-1003_80-82 (20150617) (240-52267-1) and ASB-1003_90-94 (20150617) (240-52267-2) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/22/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52267-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	F1	MS and/or MSD Recovery is outside acceptance limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Minneapolis, MN US 55401

CADENA project ID: E200572
Project: FORD-Twin Cities Assembly Plant
Project number: DE000372.0003
Laboratory: TestAmerica - North Canton
Laboratory submittal: 52267-1
Sample date: 2015-06-17 2015-06-18
Report received by CADENA: 2015-07-07
Initial Data Verification completed by CADENA: 2015-07-07

The following minor QC exceptions or missing information were noted:

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

GCMS SVOC CCV response outliers as noted in the laboratory submittal case narrative were not used to qualify results as part of this level 2 verification review.

GCMS VOC QC batch 186224 did not include MS recovery data due to insufficient sample volume available for creating MS/MSD"s according to laboratory submittal case narrative.

GCMS SVOC QC batch 186070 MS recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

Metals method blanks had detections below the RL in QC batch 186553 for zinc and in QC batch 187231 for barium, calcium, chromium, iron, magnesium, manganese, potassium, arsenic, lead and selenium and in QC batch 187416 for TCLP copper and nickel. Metals results should be considered to be non-detect at the RL and qualified with UB flags for the following samples and analytes:
TCLP COPPER - UB flags - -002.
TCLP NICKEL - UB flags - -002.
TCLP CHROMIUM - UB flags - -001, -002.
TCLP POTASSIUM - UB flags - -001, -002.
TCLP ARSENIC - UB flags - -001, -002.
TCLP LEAD - UB flags - -001, -002.
TCLP SELENIUM - UB flags - -001, -002.

Metals QC batches MS/MSD recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

3 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, GC VOC, GC Other, Metals and General Chemistry parameter(s).

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

ANALYTICAL REPORT

Job Number: 240-52291-1

Job Description: Ford TCAP - E200572

For:
ARCADIS U.S., Inc.
28550 Cabot Drive
Suite 500
Novi, MI 48377

Attention: Kristoffer Hinskey

Approved for release.
Denise Pohl
Project Manager II
7/8/2015 1:39 PM

Denise Pohl, Project Manager II
4101 Shuffel Street NW, North Canton, OH, 44720

07/08/2015

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52291-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 6/20/2015 10:30 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 2.0º C, 2.8º C and 3.0º C.

TCLP VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for TCLP volatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8260B. The samples were leached on 06/25/2015 and analyzed on 06/26/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4), ASB-1004_83-85(20150619) (240-52291-5) and MB01(20150619) (240-52291-6) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/22/2015 and analyzed on 06/23/2015 and 06/24/2015.

1,2-Dichloroethane-d4 (Surr), 4-Bromofluorobenzene (Surr), Dibromofluoromethane (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for ASB-1004_60-62(20150619) (240-52291-2). 1,2-Dichloroethane-d4 (Surr) and 4-Bromofluorobenzene (Surr) failed the surrogate recovery criteria high for ASB-1004_69-70(20150619) (240-52291-3). Refer to the QC report for details.

Samples ASB-1004_60-62(20150619) (240-52291-2)[333.33X] and ASB-1004_69-70(20150619) (240-52291-3)[25X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-186224 and analytical batch 240-186326 on these samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_79-80(20150619) (240-52291-4), ASB-1004_83-85(20150619) (240-52291-5) and MB01(20150619) (240-52291-6) .

Method(s) 8260B: A MS/MSD was prepared for batch 186224, but was analyzed in a different analytical batch. Batch includes: ASB-1004_60-62(20150619) (240-52291-2) and ASB-1004_69-70(20150619) (240-52291-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for TCLP semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8270C. The samples were leached on 06/28/2015, prepared on 06/29/2015 and 07/06/2015 and analyzed on 06/30/2015, 07/01/2015 and 07/07/2015.

1,4-Dichlorobenzene failed the recovery criteria low for LCS 240-187216/5-A. Refer to the QC report for details.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Method(s) 8270C: The laboratory control sample (LCS) for 187216 recovered outside control limits for the following analyte: 1,4-Dichlorobenzene. The associated sample(s) was re-prepared and/or re-analyzed outside holding time. Both sets of data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 06/23/2015 and analyzed on 06/25/2015, 06/26/2015 and 06/27/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Bis(2-ethylhexyl) phthalate and Di-n-butyl phthalate were detected in method blank MB 240-186302/12-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria low for ASB-1004_60-62(20150619) (240-52291-2). Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria low for ASB-1004_69-70(20150619) (240-52291-3). Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria low for ASB-1004_69-70(20150619)MS (240-52291-3MS). Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria low for ASB-1004_69-70(20150619)MSD (240-52291-3MSD). Refer to the QC report for details.

Several analytes failed the recovery criteria low for the MS of sample ASB-1004_69-70(20150619)MS (240-52291-3) in batch 240-187094. 2,4-Dinitrophenol failed the recovery criteria high. Several analytes failed the recovery criteria low for the MSD of sample ASB-1004_69-70(20150619)MSD (240-52291-3) in batch 240-187094. Several analytes failed the recovery criteria high. Refer to the QC report for details.

Samples ASB-1004_60-62(20150619) (240-52291-2)[20X], ASB-1004_69-70(20150619) (240-52291-3)[25X] and ASB-1004_83-85(20150619) (240-52291-5)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 8270C: The following samples was diluted due to the nature of the sample matrix: ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_60-62(20150619) MS (240-52291-M-2-N MS), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_69-70(20150619) MS (240-52291-I-3-B MS), ASB-1004_69-70(20150619) MSD (240-52291-I-3-C MSD), ASB-1004_83-85(20150619) (240-52291-5) and (240-52289-C-4-C) and (240-52289-C-4-D MS). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4), ASB-1004_83-85(20150619) (240-52291-5) and MB01(20150619) (240-52291-6) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared on 06/25/2015 and analyzed on 06/25/2015 and 06/26/2015.

Samples ASB-1004_60-62(20150619) (240-52291-2)[100X], ASB-1004_69-70(20150619) (240-52291-3)[100X], ASB-1004_79-80(20150619) (240-52291-4)[10X] and ASB-1004_83-85(20150619) (240-52291-5)[10X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 06/27/2015 and analyzed on 06/29/2015 and

06/30/2015.

Samples ASB-1004_60-62(20150619) (240-52291-2)[500X] and ASB-1004_69-70(20150619) (240-52291-3)[50X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) WI-DRO: Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the WI DRO Mix: ASB-1004_60-62(20150619) (240-52291-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP METALS (ICP)

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for TCLP metals (ICP) in accordance with EPA SW-846 Methods 1311/6010B. The samples were leached on 06/28/2015, prepared on 06/29/2015 and 06/30/2015 and analyzed on 06/30/2015 and 07/01/2015.

Several analytes were detected in method blank LB 240-187116/1-B at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Copper and Nickel were detected in method blank LB 240-187116/1-D at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Antimony, Arsenic and Lead were detected in method blank LB 240-187117/1-B at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Copper was detected in method blank LB 240-187117/1-D at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Barium, Lead and Potassium were detected in method blank MB 240-187231/2-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Antimony, Cadmium and Lead were detected in method blank MB 240-187247/2-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Calcium and Manganese failed the recovery criteria high for the MS of sample 240-52266-2 in batch 240-187366. Calcium failed the recovery criteria high for the MSD of sample 240-52266-2 in batch 240-187366. Zinc failed the recovery criteria low for the MS of sample 240-52266-2 in batch 240-187549. Lead and Zinc failed the recovery criteria low for the MS of sample ASB-1004_60-62(20150619)MS (240-52291-2) in batch 240-187549. Lead failed the recovery criteria low for the MSD of sample ASB-1004_60-62(20150619)MSD (240-52291-2) in batch 240-187549. Iron, Manganese and Zinc failed the recovery criteria high. Refer to the QC report for details.

Samples ASB-1004_60-62(20150619) (240-52291-2)[5X] and ASB-1004_60-62(20150619) (240-52291-2)[50X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL METALS (ICP)

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/24/2015 and analyzed on 06/25/2015.

Zinc was detected in method blank MB 240-186553/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Several analytes failed the recovery criteria low for the MS of sample 240-52266-1 in batch 240-186732. Aluminum, Barium and Iron failed the recovery criteria high. For the MSD of sample 240-52266-1 in batch 240-186732, Antimony failed the recovery criteria low. Several analytes failed the recovery criteria high. Also, Calcium, Lead, Magnesium and Manganese exceeded the RPD limit. Refer to the QC report for details.

Sample ASB-1004_60-62(20150619) (240-52291-2)[10X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 3010A: The matrix spike and matrix spike duplicate (MS/MSD) was spiked post preservation due to reprep of the batch. Batch includes: ASB-1004_60-62(20150619) (240-52291-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP MERCURY

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 06/28/2015, prepared on 06/29/2015 and analyzed on 06/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/24/2015 and analyzed on 06/26/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HEXAVALENT CHROMIUM

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 3060A/7196A. The samples were prepared on 06/24/2015 and 06/29/2015 and analyzed on 06/25/2015 and 06/30/2015.

Sample ASB-1004_60-62(20150619) (240-52291-2)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 7196A: The following sample was diluted for hexavalent chromium due to the nature of the sample matrix: ASB-1004_60-62(20150619) (240-52291-2). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TRIVALENT CHROMIUM

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for trivalent chromium in accordance with EPA SW-846 Method 7196A_CR3. The samples were analyzed on 07/01/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples ASB-1004_37-40(20150619) (240-52291-1), ASB-1004_60-62(20150619) (240-52291-2), ASB-1004_69-70(20150619) (240-52291-3), ASB-1004_79-80(20150619) (240-52291-4) and ASB-1004_83-85(20150619) (240-52291-5) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/23/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EXECUTIVE SUMMARY - Detections

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52291-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	*	LCS or LCSD is outside acceptance limits.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	H	Sample was prepped or analyzed beyond the specified holding time
	X	Surrogate is outside control limits
GC VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC Semi VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

ARCADIS
430 First Avenue North, Ste 720
Minneapolis, MN US 55401

CADENA project ID: E200572
Project: FORD-Twin Cities Assembly Plant
Project number: DE000372.0003
Laboratory: TestAmerica - North Canton
Laboratory submittal: 52291-1
Sample date: 2015-06-19
Report received by CADENA: 2015-07-08
Initial Data Verification completed by CADENA: 2015-07-08

The following minor QC exceptions or missing information were noted:

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

WI-GRO QC batch method blank had a detection below the RL. Client samples -001 and -004 WI-GRO results should be considered to be non-detect at the RL and qualified with UB flags and sample -005 non-detect at the concentration reported and qualified with a B flag.

GCMS VOC QC batch 186224 did not include MS recovery data due to insufficient sample volume available for creating MS/MSD"s according to laboratory submittal case narrative.

GCMS SVOC client sample -003 totals analysis MS recoveries were diluted to below reliably quantifiable levels so were not used to qualify results. Sample -002 re-analysis MS recoveries were outliers biased low for hexachloroethane. These results were not considered to be the reportable results so qualification was not required based on this low bias QC outlier.

GCMS VOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client samples -002 and -003 totals analyses.

GCMS VOC trip blank had a detection below the RL for methyl acetate. Client samples -001 and -005 results for this analyte should be considered to be non-detect at the RL and qualified with UB flags.

GCMS SVOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client samples -002 and -003 totals analyses. Note: client sample -002 TCLP re-analysis was performed outside of the referenced holding time so these re-analysis results should be considered to be estimated and qualified with J flags if detected and UJ flags if non-detect.

GCMS SVOC QC batch 186302 method blank had detections below the RL for bis-2-ethylhexylphthalate and di-n-butylphthalate. Client samples -001, -004 and -005 bis-2-ethylhexylphthalate and samples -001 and -004 di-n-butylphthalate results should be considered to be non-detect at the RL and qualified with UB flags.

GCMS SVOC QC batch 187216 LCS recoveries were outliers biased low for 1,4-dichlorobenzene. Qualification of reportable client sample results was not required based on this LCS recovery outlier.

Metals method blanks had detections below the RL in QC batch 186553 for zinc and in QC batch 187231 for barium, calcium, chromium, iron, magnesium, manganese, potassium, arsenic, lead and selenium and in QC batch 187416 for TCLP copper and nickel and batch 187418 for TCLP copper and batch 187247 for antimony, arsenic, lead and cadmium. Metals results should be considered to be non-detect at the RL and qualified with UB flags for the following samples and analytes:
TCLP COPPER - UB flags - -003.
TCLP CHROMIUM - UB flags - -001, -003, -004 and -005.
TCLP ARSENIC - UB flags - -001, -003, -004 and -005.
TCLP LEAD - UB flags - -001, -003, -004 and -005.
TCLP SELENIUM - UB flags - -001, -003.
TCLP IRON - UB flags - -004 and -005.

Metals QC batch 187416, 187247, 186553 MS/MSD recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

Metals sample -002 MS/MSD recoveries were not considered to be statistically reliable due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule) so were not used to qualify results for calcium, iron, manganese, lead and zinc.

5 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, GC VOC, GC Other, Metals and General Chemistry parameter(s). 1 Trip blank was analyzed for GCMS VOC parameters.

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, MS/MSD Recovery, MS/MSD RPD, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52439-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 6/24/2015 9:30 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 5 coolers at receipt time were 3.4º C, 3.8º C, 4.0º C, 4.2º C and 4.6º C.

Exceptions: The following samples were received without a pre-weighed methanol container for WI-DRO: ASB-1006_39-42(20150622) (240-52439-1) and ASB-1006_52-54(20150622) (240-52439-2). The client was contacted regarding this issue, and the laboratory was instructed to proceed with TPH-DRO analysis instead of the WI-DRO.

TCLP VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for TCLP volatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8260B. The samples were leached on 06/29/2015 and analyzed on 07/01/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), MB-01(20150623) (240-52439-7), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9), ASB-1007_75-77(20150623) (240-52439-10) and MB-01(20150623) (240-52439-11) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/26/2015 and analyzed on 06/29/2015 and 06/30/2015.

1,2-Dichloroethane-d4 (Surr) and Dibromofluoromethane (Surr) failed the surrogate recovery criteria high for MB-01(20150623) (240-52439-11). 1,2-Dichloroethane-d4 (Surr), Dibromofluoromethane (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for ASB-1007_22-25(20150623) (240-52439-6). 1,2-Dichloroethane-d4 (Surr), 4-Bromofluorobenzene (Surr), Dibromofluoromethane (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for ASB-1007_67-70(20150623) (240-52439-9). Refer to the QC report for details.

Acetone failed the recovery criteria high for MRL 240-187197/8. Refer to the QC report for details.

Samples ASB-1006_57-60(20150622) (240-52439-3)[1.25X], ASB-1007_22-25(20150623) (240-52439-6)[33.33X] and ASB-1007_67-70(20150623) (240-52439-9)[200X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 8260B: Surrogate recovery for the following sample was outside of acceptance limits: MB-01(20150623) (240-52439-11). There was insufficient sample to perform a re-extraction; therefore, the data have been reported.

Method(s) 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 240-186967 and analytical batch 240-187197.

Method(s) 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-186967 and analytical batch 240-187454 on this sample ASB-1006_52-54(20150622) (240-52439-2) .

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for TCLP semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8270C. The samples were leached on 06/29/2015, prepared on 07/06/2015 and analyzed on 07/08/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Method(s) 3540C: Due to the matrix, the following sample could not be concentrated to the final method required volume: ASB-1007_67-70(20150623) (240-52439-9). The reporting limits (RLs) are elevated proportionately.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 06/29/2015 and 06/30/2015 and analyzed on 07/01/2015, 07/09/2015 and 07/10/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Several analytes failed the surrogate recovery criteria low for ASB-1007_22-25(20150623) (240-52439-6). Terphenyl-d14 (Surr) failed the surrogate recovery criteria high. 2,4,6-Tribromophenol (Surr), 2-Fluorobiphenyl (Surr), 2-Fluorophenol (Surr), Nitrobenzene-d5 (Surr), Phenol-d5 (Surr) and Terphenyl-d14 (Surr) failed the surrogate recovery criteria low for ASB-1007_67-70(20150623) (240-52439-9). Refer to the QC report for details.

Hexachlorocyclopentadiene failed the recovery criteria low for the MS/MSD of sample 240-52391-49 in batch 240-187535.

Several analytes failed the recovery criteria low for the MS/MSD of sample 240-52442-3 in batch 240-188479. Refer to the QC report for details.

Samples ASB-1006_57-60(20150622) (240-52439-3)[20X], ASB-1006_65-67(20150622) (240-52439-4)[4X], ASB-1007_22-25(20150623) (240-52439-6)[200X], ASB-1007_22-25(20150623) (240-52439-6)[500X], ASB-1007_62-65(20150623) (240-52439-8)[4X] and ASB-1007_67-70(20150623) (240-52439-9)[133.34X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 8270C: The following samples were diluted due to the nature of the sample matrix: ASB-1007_22-25(20150623) (240-52439-6) and ASB-1007_67-70(20150623) (240-52439-9). Elevated reporting limits (RLs) are provided.

Method(s) 3540C: Due to the matrix, the following sample could not be concentrated to the final method required volume: ASB-1007_67-70(20150623) (240-52439-9). The reporting limits (RLs) are elevated proportionately.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), MB-01(20150623) (240-52439-7), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623)

(240-52439-9), ASB-1007_75-77(20150623) (240-52439-10) and MB-01(20150623) (240-52439-11) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared on 06/26/2015 and analyzed on 06/26/2015 and 06/29/2015.

Samples ASB-1007_22-25(20150623) (240-52439-6)[10X] and ASB-1007_67-70(20150623) (240-52439-9)[100X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) WI-GRO: Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the Gasoline Range Organics (GRO) mix (i.e., Naphthalene): ASB-1006_65-67(20150622) (240-52439-4) and ASB-1007_22-25(20150623) (240-52439-6).

Method(s) WI-GRO: The following sample was diluted due to the nature of the sample matrix: ASB-1007_22-25(20150623) (240-52439-6). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3) and ASB-1007_62-65(20150623) (240-52439-8) were analyzed for diesel range organics (DRO) in accordance with EPA SW-846 Method 8015B - DRO. The samples were prepared on 06/29/2015 and 07/02/2015 and analyzed on 06/30/2015 and 07/06/2015.

Surrogates are added during the extraction process prior to dilution. When the sample dilution is 5X or greater, surrogate recoveries are diluted out and no corrective action is required.

Sample ASB-1006_57-60(20150622) (240-52439-3)[10X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO

Samples ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 06/27/2015 and analyzed on 06/29/2015 and 06/30/2015.

Samples ASB-1006_39-42(20150622) (240-52439-1) and ASB-1006_52-54(20150622) (240-52439-2) were not received in proper container for WI DRO and per client OK to do by EPA SW-846 Method 8015B - DRO. Samples ASB-1006_57-60(20150622) (240-52439-3) and ASB-1007_62-65(20150623) (240-52439-8) were received with less than 25 grams and per client OK to do by EPA SW-846 Method 8015B - DRO.

Samples ASB-1006_65-67(20150622) (240-52439-4)[2X], ASB-1007_22-25(20150623) (240-52439-6)[100X], ASB-1007_67-70(20150623) (240-52439-9)[200X] and ASB-1007_75-77(20150623) (240-52439-10)[100X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) WI-DRO: Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the WIS DRO mix : ASB-1006_65-67(20150622) (240-52439-4), ASB-1007_22-25(20150623) (240-52439-6) and ASB-1007_75-77(20150623) (240-52439-10).

Method(s) WI DRO PREP: Due to the matrix, the following sample could not be concentrated to the final method required volume: ASB-1007_67-70(20150623) (240-52439-9). The reporting limits (RLs) are elevated proportionately.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP METALS (ICP)

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for TCLP metals (ICP) in accordance with EPA SW-846 Methods 1311/6010B. The samples were leached on 06/29/2015, prepared on 06/30/2015 and analyzed on 07/01/2015 and 07/02/2015.

Several analytes were detected in method blank LB 240-187303/1-B at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Sample ASB-1007_67-70(20150623) (240-52439-9)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Vanadium was detected in method blank MB 240-187383/2-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

TOTAL METALS (ICP)

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/26/2015 and analyzed on 06/29/2015 and 06/30/2015.

Barium, Manganese, Nickel and Vanadium were detected in method blank MB 240-186943/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Barium was detected in method blank MB 240-186969/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Antimony and Calcium failed the recovery criteria low for the MS of sample ASB-1006_39-42(20150622)MS (240-52439-1) in batch 240-187203. Aluminum, Copper, Iron and Manganese failed the recovery criteria high.

For the MSD of sample ASB-1006_39-42(20150622)MSD (240-52439-1) in batch 240-187203, Antimony and Calcium failed the recovery criteria low. Aluminum, Iron and Manganese failed the recovery criteria high. Also, Copper exceeded the RPD limit.

Several analytes failed the recovery criteria low for the MS of sample 240-52462-1 in batch 240-187366. Aluminum failed the recovery criteria high.

For the MSD of sample 240-52462-1 in batch 240-187366, several analytes failed the recovery criteria low. Aluminum failed the recovery criteria high. Also, Copper exceeded the RPD limit.

Refer to the QC report for details.

Sample ASB-1007_67-70(20150623) (240-52439-9)[10X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP MERCURY

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 06/29/2015, prepared on 06/30/2015 and analyzed on 07/01/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/26/2015 and analyzed on 06/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HEXAVALENT CHROMIUM

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 3060A/7196A. The samples were prepared on 07/01/2015 and analyzed on 07/02/2015.

Samples ASB-1006_39-42(20150622) (240-52439-1)[5X], ASB-1006_65-67(20150622) (240-52439-4)[5X] and ASB-1007_67-70(20150623) (240-52439-9)[10X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Method(s) 7196A: The following samples was diluted due to the nature of the sample matrix: ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_65-67(20150622) (240-52439-4) and ASB-1007_67-70(20150623) (240-52439-9). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TRIVALENT CHROMIUM

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for trivalent chromium in accordance with EPA SW-846 Method 7196A_CR3. The samples were analyzed on 07/02/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples ASB-1006_39-42(20150622) (240-52439-1), ASB-1006_52-54(20150622) (240-52439-2), ASB-1006_57-60(20150622) (240-52439-3), ASB-1006_65-67(20150622) (240-52439-4), ASB-1006_78-80(20150622) (240-52439-5), ASB-1007_22-25(20150623) (240-52439-6), ASB-1007_62-65(20150623) (240-52439-8), ASB-1007_67-70(20150623) (240-52439-9) and ASB-1007_75-77(20150623) (240-52439-10) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/25/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52439-1

Lab Section	Qualifier	Description
GC/MS VOA		
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC/MS Semi VOA		
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC Semi VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Rob Ellis
ARCADIS
430 First Avenue North, Ste 720
Minneapolis, MN US 55401

CADENA project ID: E200572
Project: FORD-Twin Cities Assembly Plant
Project number: DE000372.0003
Laboratory: TestAmerica - North Canton
Laboratory submittal: 52439-1
Sample date: 2015-06-22 2015-06-23
Report received by CADENA: 2015-07-10
Initial Data Verification completed by CADENA: 2015-07-11

The following minor QC exceptions or missing information were noted:

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

GCMS VOC QC batch 186967 did not include MS recovery data due to insufficient sample volume available for creating MS/MSD's according to laboratory submittal case narrative.

GCMS VOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client samples -006 and -009 totals analyses. Client sample -011 surrogate recoveries were outliers biased high for 2 out of 4 surrogates so detected GCMS VOC analytes should be considered to be estimated and qualified with J flags with non-detect results not requiring qualification.

GCMS SVOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client samples -006 and -009 totals analyses.

GCMS SVOC QC batch and Metals QC batch 186943, 187383 MS recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

Metals method blanks had detections below the RL in QC batch 186969 for total zinc and in QC batch 187383 for TCLP barium, chromium, manganese, nickel, potassium, arsenic and vanadium and in QC batch 186943 for total barium, manganese, nickel and vanadium. Metals results should be considered to be non-detect at the RL and qualified with UB flags for the following samples and analytes:
TCLP CHROMIUM - UB flags - -001, -002, -003, -004, -005, -006, -008, -009 and -010.
TCLP ARSENIC - UB flags - -001, -002, -003, -004, -005, -006, -008, -009 and -010.
TCLP VANADIUM - UB flags - -009 and -010.

Metals sample -001 MS/MSD recoveries were not considered to be statistically reliable due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule) so were not used to qualify results for aluminum, iron and manganese. MS/MSD recoveries were outliers biased low for antimony and calcium and MS or MSD recovery but not both along with the MS/MSD RPD were outliers with the recovery biased high for copper. Client sample -001 total antimony, calcium and copper results should be considered to be estimated and qualified with J flags if detected and UJ flags if non-detect.

11 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, GC VOC, GC Other, Metals and General Chemistry parameter(s).

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, MS/MSD Recovery, MS/MSD RPD, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

SAMPLING AND ANALYSIS SUMMARY

CADENA Project ID: E200572
Laboratory: TestAmerica-North Canton

ANALYTICAL REPORT

Job Number: 240-52462-2

Job Description: Ford TCAP - E200572

For:
ARCADIS U.S., Inc.
28550 Cabot Drive
Suite 500
Novi, MI 48377

Attention: Kristoffer Hinskey

Approved for release.
John McFadden
Project Manager I
7/13/2015 5:15 PM

Designee for
Denise Pohl, Project Manager II
4101 Shuffel Street NW, North Canton, OH, 44720
(330)966-9789
denise.pohl@testamericainc.com
07/13/2015

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52462-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 6/25/2015 9:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 7 coolers at receipt time were 1.8º C, 2.6º C, 3.2º C, 3.8º C, 3.8º C, 4.4º C and 4.8º C.

TCLP VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for TCLP volatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8260B. The samples were leached on 07/01/2015 and analyzed on 07/04/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13), ASB-1008_70-72(20150624) (240-52462-14) and MB-01(20150624) (240-52462-15) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/27/2015 and analyzed on 07/01/2015.

1,2-Dichloroethane-d4 (Surr), 4-Bromofluorobenzene (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for ASB-1008_30-33(20150624) (240-52462-12). 1,2-Dichloroethane-d4 (Surr), 4-Bromofluorobenzene (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for ASB-1008_70-72(20150624) (240-52462-14).

Sample ASB-1008_30-33(20150624) (240-52462-12)[100X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-187043 and analytical batch 240-187606 on these samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13), ASB-1008_70-72(20150624) (240-52462-14) and MB-01(20150624) (240-52462-15) .

Surrogate recovery for the following sample was outside of acceptance limits: ASB-1008_70-72(20150624) (240-52462-14). There was insufficient sample to perform a re-extraction; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for TCLP semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8270C. The samples were leached on 06/30/2015, prepared on 07/01/2015 and analyzed on 07/06/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)
Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 06/30/2015 and analyzed on 07/08/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

2,4,6-Tribromophenol (Surr), 2-Fluorobiphenyl (Surr), 2-Fluorophenol (Surr), Nitrobenzene-d5 (Surr), Phenol-d5 (Surr) and Terphenyl-d14 (Surr) failed the surrogate recovery criteria low for ASB-1008_30-33(20150624) (240-52462-12).

Samples ASB-1008_30-33(20150624) (240-52462-12)[1000X] and ASB-1008_52-54(20150624) (240-52462-13)[4X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO
Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13), ASB-1008_70-72(20150624) (240-52462-14) and MB-01(20150624) (240-52462-15) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared on 06/26/2015 and analyzed on 06/27/2015 and 06/29/2015.

Sample ASB-1008_30-33(20150624) (240-52462-12)[20X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the Gasoline Range Organics (GRO) mix (i.e., Naphthalene): ASB-1008_30-33(20150624) (240-52462-12) and ASB-1008_70-72(20150624) (240-52462-14).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO
Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 06/27/2015 and analyzed on 06/30/2015.

Sample ASB-1008_30-33(20150624) (240-52462-12)[200X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the WIS DRO mix : ASB-1008_30-33(20150624) (240-52462-12).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP METALS (ICP)
Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for TCLP metals (ICP) in accordance with EPA SW-846 Methods 1311/6010B. The samples were leached on 06/30/2015, prepared on 07/01/2015 and analyzed on 07/02/2015.

Iron, Magnesium and Potassium were detected in method blank MB 240-187567/2-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Several analytes were detected in method blank LB 240-187499/1-B at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL METALS (ICP)

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/26/2015 and analyzed on 06/30/2015.

Barium, Manganese, Nickel and Vanadium were detected in method blank MB 240-186943/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP MERCURY

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 06/30/2015, prepared on 07/01/2015 and analyzed on 07/02/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/26/2015 and analyzed on 06/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HEXAVALENT CHROMIUM

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 3060A/7196A. The samples were prepared on 07/06/2015 and analyzed on 07/07/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TRIVALENT CHROMIUM

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for trivalent chromium in accordance with EPA SW-846 Method 7196A_CR3. The samples were analyzed on 07/02/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples ASB-1008_30-33(20150624) (240-52462-12), ASB-1008_52-54(20150624) (240-52462-13) and ASB-1008_70-72(20150624) (240-52462-14) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/26/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EXECUTIVE SUMMARY - Detections

Client: ARCADIS U.S., Inc. Job Number: 240-52462-2

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52462-2

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC/MS Semi VOA		
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC Semi VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Rob Ellis
ARCADIS
430 First Avenue North, Ste 720
Minneapolis, MN US 55401

CADENA project ID: E200572
Project: FORD-Twin Cities Assembly Plant
Project number: DE000372.0003
Laboratory: TestAmerica - North Canton
Laboratory submittal: 52462-2
Sample date: 2015-06-24
Report received by CADENA: 2015-07-13
Initial Data Verification completed by CADENA: 2015-07-14

The following minor QC exceptions or missing information were noted:

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

GCMS VOC QC batch 187043 did not include MS recovery data due to insufficient sample volume available for creating MS/MSD's according to laboratory submittal case narrative.

GCMS VOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client samples -012 totals analyses. Client sample -014 surrogate recoveries were outliers biased high for 3 out of 4 surrogates so detected TOTAL GCMS VOC analytes should be considered to be estimated and qualified with J flags with non-detect results not requiring qualification.

GCMS SVOC surrogate recoveries were diluted to below reliably quantifiable levels so were not used to qualify results for client samples -012 totals analyses.

GCMS SVOC QC batch and Metals QC batch 186943 MS recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

Metals method blanks had detections below the RL in QC batch 187567 for TCLP barium, chromium, manganese, nickel, potassium, arsenic, iron and magnesium and in QC batch 186943 for total barium, manganese, nickel and vanadium. Metals results should be considered to be non-detect at the RL and qualified with UB flags for the following samples and analytes:
TCLP CHROMIUM - UB flags - -012, -013 and -014.
TCLP ARSENIC - UB flags - -012, -013 and -014.
TCLP IRON - UB flags - -012.

Metals sample -012 MS/MSD recoveries were not considered to be statistically reliable due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule) so were not used to qualify results for calcium and manganese.

4 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, GC VOC, GC Other, Metals and General Chemistry parameter(s).

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, MS/MSD Recovery, MS/MSD RPD, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52505-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 6/26/2015 9:20 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 5 coolers at receipt time were 1.6º C, 1.8º C, 3.2º C, 4.2º C and 5.2º C.

TCLP VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for TCLP volatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8260B. The samples were leached on 06/30/2015 and analyzed on 07/03/2015 and 07/04/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6), ASB-1010_55-57(20150625) (240-52505-7) and MB-01(20150625) (240-52505-8) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/27/2015 and analyzed on 06/29/2015.

1,2-Dichloroethane-d4 (Surr) failed the surrogate recovery criteria high for ASB-1009_70-72(20150625) (240-52505-4).

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with 187104.

Surrogate recovery for the following sample was outside the upper control limit: ASB-1009_70-72(20150625) (240-52505-4). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625)

(240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for TCLP semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Methods 1311/8270C. The samples were leached on 07/01/2015, prepared on 07/02/2015 and analyzed on 07/07/2015 and 07/09/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

The continuing calibration verification (CCV) associated with batch 188482 recovered above the upper control limit for Pentachlorophenol. The samples associated with this CCV were non-detect for the affected analyte; therefore, the data have been reported. The following samples are impacted: ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 06/30/2015, 07/08/2015 and 07/11/2015 and analyzed on 07/08/2015, 07/10/2015 and 07/14/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Bis(2-ethylhexyl) phthalate was detected in method blank MB 240-188303/4-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Caprolactam, Di-n-butyl phthalate, Isophorone and Phenol were detected in method blank MB 240-188303/4-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Bis(2-ethylhexyl) phthalate and Di-n-butyl phthalate were detected in method blank MB 240-188799/17-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Bis(2-ethylhexyl) phthalate failed the recovery criteria high for LCS 240-188303/5-A.

Samples ASB-1009_42-44(20150624) (240-52505-2)[6.67X], ASB-1010_70-73(20150625) (240-52505-6)[2.5X] and ASB-1010_70-73(20150625) (240-52505-6)[4X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

The Method Blank and Laboratory Control Sample (LCS) for batch 188303 associated with samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) recovered outside control limits for Bis-2-ethylhexyl phthalate. Upon re-extraction and re-analysis all QC met acceptance criteria, however, sample holding times had been exceeded. Both sets of data will be reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6), ASB-1010_55-57(20150625) (240-52505-7) and MB-01(20150625) (240-52505-8) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared and analyzed on 06/29/2015.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the Gasoline Range Organics (GRO) mix (i.e., Naphthalene): ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1010_38-40(20150625) (240-52505-5) and ASB-1010_70-73(20150625) (240-52505-6).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 07/02/2015 and analyzed on 07/06/2015 and 07/07/2015.

WI Diesel Range Organics (C10-C28) failed the recovery criteria high for LCSD 240-187816/23-A. WI Diesel Range Organics (C10-C28) exceeded the RPD limit.

Sample ASB-1010_38-40(20150625) (240-52505-5)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the WI Diesel Range Organics (C10-C28) : ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_62-65(20150624) (240-52505-3), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6), and ASB-1010_55-57(20150625) (240-52505-7).

The laboratory control sample duplicate (LCSD) for preparation batch 240-187816 and analytical batch 240-188186 recovered outside acceptance limits for WI Diesel Range Organics (C10-C28). There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported.

The laboratory control sample duplicate (LCSD) for preparation batch 240-187816 and analytical batch 240-188039 recovered outside acceptance limits for WI Diesel Range Organics (C10-C28). There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported.

The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 240-187816 recovered outside control limits for the following analytes: WI Diesel Range Organics (C10-C28) .

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP METALS (ICP)

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for TCLP metals (ICP) in accordance with EPA SW-846 Methods 1311/6010B. The samples were leached on 07/01/2015, prepared on 07/02/2015 and analyzed on 07/06/2015.

Several analytes were detected in method blank LB 240-187731/1-B at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Manganese was detected in method blank MB 240-187780/2-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL METALS (ICP)

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/30/2015 and analyzed on 07/01/2015 and 07/06/2015.

Magnesium, Nickel and Zinc were detected in method blank MB 240-187368/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TCLP MERCURY

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 07/01/2015, prepared on 07/02/2015 and analyzed on 07/06/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/30/2015 and analyzed on 07/01/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HEXAVALENT CHROMIUM

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625)

(240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 3060A/7196A. The samples were prepared on 07/06/2015 and analyzed on 07/07/2015.

Samples ASB-1009_55-57(20150624) (240-52505-1)[2X] and ASB-1010_55-57(20150625) (240-52505-7)[2X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TRIVALENT CHROMIUM

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for trivalent chromium in accordance with EPA SW-846 Method 7196A_CR3. The samples were analyzed on 07/07/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples ASB-1009_55-57(20150624) (240-52505-1), ASB-1009_42-44(20150624) (240-52505-2), ASB-1009_62-65(20150624) (240-52505-3), ASB-1009_70-72(20150625) (240-52505-4), ASB-1010_38-40(20150625) (240-52505-5), ASB-1010_70-73(20150625) (240-52505-6) and ASB-1010_55-57(20150625) (240-52505-7) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/27/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52505-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	*	LCS or LCSD is outside acceptance limits.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	H	Sample was prepped or analyzed beyond the specified holding time
GC VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC Semi VOA		
	*	LCS or LCSD is outside acceptance limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	*	RPD of the LCS and LCSD exceeds the control limits
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Minneapolis, MN US 55401

CADENA project ID: E200572
Project: FORD-Twin Cities Assembly Plant
Project number: DE000372.0003
Laboratory: TestAmerica - North Canton
Laboratory submittal: 52505-1
Sample date: 2015-06-24 2015-06-25
Report received by CADENA: 2015-07-15
Initial Data Verification completed by CADENA: 2015-07-17

The following minor QC exceptions or missing information were noted:

GCMS VOC CCV response outliers as noted in the laboratory submittal case narrative were not used to qualify results as part of this level 2 verification review.

GCMS VOC QC batch 187104 did not include MS recovery data due to insufficient sample volume available according to the laboratory submittal case narrative.

GCMS VOC sample -004 surrogate recoveries were outliers biased high for 1 out of 4 surrogates. Client sample -004 detected GCMS VOC analytes should be considered to be estimated and qualified with J flags. Non-detect results did not require qualification.

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

WI-DRO QC batch LCS duplicate recovery as an outlier biased high along with an outlier for the LCS/LCSD RPD. Client samples -001, -002, -003, -004, -005, -006, -007 WI-DRO results should be considered to be estimated and qualified with J flags.

GCMS SVOC method blanks had detections below the RL for bis-2-ethylhexylphthalate and di-n-butylphthalate in QC batch 188799 and for bis-2-ethylhexylphthalate, caprolactam, di-n-butylphthalate, isophorone and phenol in QC batch 188303. Client samples bis-2-ethylhexylphthalate -001, -003, -004, -005 and -007 re-analysis results should be considered to be non-detect at the RL and qualified with UB flags. Note: re-analysis results were used as final reportable results for these samples and sample -006 which was non-detect. Client samples -001, -002, -004, -005 and -007 di-n-butylphthalate results and client samples -003 and -007 caprolactam results and client sample -005 phenol results should also be considered to be non-detect at the RL and qualified with UB flags.

GCMS SVOC QC batch 188303 LCS recoveries were outliers biased high for bis-2-ethylhexylphthalte. Client samples -001, -003, -004, -005, -006 and -007 were re-analyzed outside of the referenced holding time in response to this LCS outlier. Re-analysis QC batch LCS recovery for this analyte was acceptable. Client sample re-analysis results should all be considered to be estimated and qualified with UJ flags based on the holding time exceedance and the bis-2-ethylhexylphthalate results are also qualified as non-detect as noted above due to associated method blank detections. The original GCMS SVOC sample results were all considered to be the final reportable values with the exception of the bis-2-ethylhexylphthalate for client samples -001, -003, -004, -005, -006 and -007 which were reported from the re-analyses results.

GCMS SVOC QC batch 188303, 187413 and 187793 and Metals QC batch 187780, 187370 and 187368 MS recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on this sample-specific QC outlier.

Metals method blanks had detections below the RL in QC batch 187368 for magnesium, nickel and zinc and in QC batch 187780 for TCLP arsenic, barium, chromium, iron, manganese, nickel and potassium. Client samples -001, -002, -003, -004, -005, -006 and -007 TCLP chromium and TCLP arsenic results and client samples -001, -002, -004, -007 TCLP iron results and client sample -001, -003, -004 and -005 TCLP nickel results should all be considered to be non-detect at the RL and qualified with UB flags.

8 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, GC VOC, GC Other, Metals and General Chemistry parameter(s).

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, MS/MSD Recovery, MS/MSD RPD, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

07/13/2015

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52462-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 6/25/2015 9:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 7 coolers at receipt time were 1.8º C, 2.6º C, 3.2º C, 3.8º C, 3.8º C, 4.4º C and 4.8º C.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples HA-03_0-0.5(20150624) (240-52462-1), HA-02_0-0.5(20150624) (240-52462-2), HA-05_0-1(20150624) (240-52462-3), HA-01_0-1(20150624) (240-52462-4), HA-04_0-1(20150624) (240-52462-5), HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8), HA-09_0-0.5(20150624) (240-52462-9), HA-10_0-1(20150624) (240-52462-10) and MB-01(20150624) (240-52462-11) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/27/2015 and analyzed on 06/29/2015, 06/30/2015 and 07/01/2015.

Acetone failed the recovery criteria high for MRL 240-187197/8.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with batch 187043..

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-187043 and analytical batch 240-187454 on these samples HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8) and HA-09_0-0.5(20150624) (240-52462-9) .

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-187043 and analytical batch 240-187606 on these samples HA-10_0-1(20150624) (240-52462-10) and MB-01(20150624) (240-52462-11) .

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples HA-03_0-0.5(20150624) (240-52462-1), HA-02_0-0.5(20150624) (240-52462-2), HA-05_0-1(20150624) (240-52462-3), HA-01_0-1(20150624) (240-52462-4), HA-04_0-1(20150624) (240-52462-5), HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8), HA-09_0-0.5(20150624) (240-52462-9) and HA-10_0-1(20150624) (240-52462-10) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 06/30/2015 and 07/09/2015 and analyzed on 07/08/2015, 07/09/2015 and 07/11/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Bis(2-ethylhexyl) phthalate was detected in method blank MB 240-188504/17-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Di-n-butyl phthalate was detected in method blank MB 240-188504/17-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

2,4,6-Tribromophenol (Surr) failed the surrogate recovery criteria low for HA-09_0-0.5(20150624) (240-52462-9).

Samples HA-02_0-0.5(20150624) (240-52462-2)[2X] and HA-06_0-1(20150624) (240-52462-7)[2.5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Surrogate recovery for the following sample was outside control limits: HA-09_0-0.5(20150624) (240-52462-9). Re-extraction and/or re-analysis was performed outside of holding time with acceptable results.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO

Samples HA-03_0-0.5(20150624) (240-52462-1), HA-02_0-0.5(20150624) (240-52462-2), HA-05_0-1(20150624) (240-52462-3), HA-01_0-1(20150624) (240-52462-4), HA-04_0-1(20150624) (240-52462-5), HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8), HA-09_0-0.5(20150624) (240-52462-9), HA-10_0-1(20150624) (240-52462-10) and MB-01(20150624) (240-52462-11) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared on 06/26/2015 and analyzed on 06/26/2015, 06/27/2015 and 06/29/2015.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the Gasoline Range Organics (GRO) mix (i.e., Naphthalene): HA-03_0-0.5(20150624) (240-52462-1) and HA-05_0-1(20150624) (240-52462-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO

Samples HA-03_0-0.5(20150624) (240-52462-1), HA-02_0-0.5(20150624) (240-52462-2), HA-05_0-1(20150624) (240-52462-3), HA-01_0-1(20150624) (240-52462-4), HA-04_0-1(20150624) (240-52462-5), HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8), HA-09_0-0.5(20150624) (240-52462-9) and HA-10_0-1(20150624) (240-52462-10) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 06/27/2015 and analyzed on 06/29/2015 and 06/30/2015.

Sample HA-06_0-1(20150624) (240-52462-7)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the WIS DRO mix : HA-03_0-0.5(20150624) (240-52462-1) and HA-06_0-1(20150624) (240-52462-7).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL METALS (ICP)

Samples HA-03_0-0.5(20150624) (240-52462-1), HA-02_0-0.5(20150624) (240-52462-2), HA-05_0-1(20150624) (240-52462-3), HA-01_0-1(20150624) (240-52462-4), HA-04_0-1(20150624) (240-52462-5), HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8), HA-09_0-0.5(20150624) (240-52462-9) and HA-10_0-1(20150624) (240-52462-10) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/26/2015 and analyzed on 06/30/2015.

Barium, Manganese, Nickel and Vanadium were detected in method blank MB 240-186943/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY

Samples HA-03_0-0.5(20150624) (240-52462-1), HA-02_0-0.5(20150624) (240-52462-2), HA-05_0-1(20150624) (240-52462-3), HA-01_0-1(20150624) (240-52462-4), HA-04_0-1(20150624) (240-52462-5), HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8), HA-09_0-0.5(20150624) (240-52462-9) and HA-10_0-1(20150624) (240-52462-10) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/26/2015 and analyzed on 06/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples HA-03_0-0.5(20150624) (240-52462-1), HA-02_0-0.5(20150624) (240-52462-2), HA-05_0-1(20150624) (240-52462-3), HA-01_0-1(20150624) (240-52462-4), HA-04_0-1(20150624) (240-52462-5), HA-07_0-1(20150624) (240-52462-6), HA-06_0-1(20150624) (240-52462-7), HA-08_0-1(20150624) (240-52462-8), HA-09_0-0.5(20150624) (240-52462-9) and HA-10_0-1(20150624) (240-52462-10) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/26/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52462-1

Lab Section	Qualifier	Description
GC/MS VOA		
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	H	Sample was prepped or analyzed beyond the specified holding time
	X	Surrogate is outside control limits
GC VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC Semi VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Report received by CADENA: 2015-07-13
Initial Data Verification completed by CADENA: 2015-07-14

The following minor QC exceptions or missing information were noted:

WI-GRO and WI-DRO QC batch did not include MS recovery data and surrogate recoveries were not available for samples or QC.

GCMS VOC QC batch 187043 did not include MS recovery data due to insufficient sample volume available for creating MS/MSD's according to laboratory submittal case narrative.

GCMS SVOC surrogate recoveries were outliers biased low and less than 10% for 1 out of 3 acid fraction surrogates for client sample -009. GCMS SVOC acid fraction analytes for client sample -009 original analysis should be considered to be unusable and qualified with R flags. Client sample -009 was re-analyzed for GCMS SVOC outside of the referenced holding time but with acceptable surrogate recoveries so these re-analysis results should be considered to be estimated and qualified with J flags if detected and UJ flags if non-detect. The original analysis unqualified base-neutral fraction GCMS SVOC analytes and re-analysis acid fraction GCMS SVOC analytes with UJ qualifiers should be considered to be the final reportable results for client sample -009.

GCMS SVOC QC batch MS recovery outliers were not determined using samples from this submittal so qualification of client sample results was not required based on these sample-specific QC outliers.

GCMS SVOC QC batch 188504 method blank had detections below the RL for bis-2-ethylhexylphthalate and di-n-butylphthalate. Qualification of client sample results was not required based on these method blank detections.

Metals method blanks had detections below the RL in QC batch 186943 for total barium, manganese, nickel and vanadium. Qualification of client sample results was not required based on these method blank detections.

Metals sample -001 MS/MSD recoveries were not considered to be statistically reliable due to elevated levels of target analyte in the original sample matrix relative to the amount spiked (4X rule) so were not used to qualify results for aluminum, calcium, iron and manganese. MS and MSD recoveries were outliers biased low for antimony, magnesium and lead and MS or MSD recoveries but not both were outliers biased low along with the MS/MSD RPD for copper. Client sample -001 results for antimony, magnesium, lead and copper should be considered to be estimated and qualified with J flags if detected and UJ flags if non-detect. MS or MSD recoveries but not both were outliers for zinc so qualification was not required based on this QC outlier alone.

11 Solid sample(s) were analyzed for GCMS VOC, GCMS SVOC, GC VOC, GC Other and Metals parameter(s).

Sample/MS/MSD Surrogate Recovery, Blank/LCS Surrogate Recovery, LCS/LCD Recovery, MS/MSD Recovery, MS/MSD RPD, Blank Contamination and Hold Time Exception were reviewed as part of our verification.

Analytical results reported between RDL and MDL are flagged 'J' and considered estimated values.

Qualifiers added during verification have been added to the electronic data which is available for download from the CADENA CLMS. Refer to the attached table of analytical results that have been qualified during verification.

The definitions of the qualifiers used for this data package are defined in the analytical report. CADENA valid qualifiers are defined in the table below. To view and download a PDF copy of the laboratory analytical report access the CADENA CLMS at http://clms.cadenaco.com/index.cfm.

Data verification for the report specified above was completed using the Ford Motor Company Environmental Laboratory Technical Specification, the CADENA Standard Operating Procedure for the Verification of Environmental Analytical Data and the associated analytical methods as references for evaluating the batch QC, sample data and report content. The EPA National Functional Guidelines for validating organic and inorganic data were used as guidance when addressing out of control QC results and the associated data qualifiers.

Please contact me if you have any questions.

Sincerely,

Jim Tomalia

Project Scientist

CADENA Valid Qualifiers

Valid Qualifiers	Description
<	Less than the reported concentration.
>	Greater than the reported concentration.
B	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was greater than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the reported concentration. For Inorganic methods the sample concentration was greater than the RDL and less than 10x the blank concentration and is considered non-detect at the reported concentration.
E	The analyte / Compound reported exceeds the calibration range and is considered estimated.
EMPC	Estimated Minimum Potential Contamination - Dioxin/Furan analyses only.
J	Indicates an estimated value. This flag is used either when estimating a concentration for a tentatively identified compound or when the data indicates the presence of an analyte / compound but the result is less than the sample Quantitation limit, but greater than zero. The flag is also used in data validation to indicate a reported value should be considered estimated due to associated quality assurance deficiencies.
J-	The result is an estimated quantity, but the result may be biased low.
JH	The sample result is considered estimated and is potentially biased high.
JL	The sample result is considered estimated and is potentially biased low.
NJ	Tentatively identified compound with approximated concentration.
R	Indicates the value is considered to be unusable. (Note: The analyte / compound may or may not be present.)
TNTC	Too Numerous to Count - Asbestos and Microbiological Results.
U	Indicates that the analyte / compound was analyzed for, but not detected.
UB	The analyte / compound was detected in the associated blank. For Organic methods the sample concentration was less than the RDL and less than 5x (or 10x for common lab contaminates) the blank concentration and is considered non-detect at the RDL. For Inorganic methods the sample concentration was less than the RDL and less than 10x the blank concentration and is considered non-detect at the RDL.
UJ	The analyte / compound was not detected above the reported sample Quantitation limit. However, the Quantitation limit is considered to be approximate due to associated quality assurance results and may or may not represent the actual limit of Quantitation to accurately and precisely report the analyte in the sample.

ANALYTICAL REPORT

Job Number: 240-52525-1

Job Description: Ford TCAP - E200572

For:
ARCADIS U.S., Inc.
28550 Cabot Drive
Suite 500
Novi, MI 48377

Attention: Kristoffer Hinskey

Approved for release.
John McFadden
Project Manager I
7/15/2015 10:52 PM

Designee for
Denise Pohl, Project Manager II
4101 Shuffel Street NW, North Canton, OH, 44720
(330)966-9789
denise.pohl@testamericainc.com
07/15/2015

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of TestAmerica and its client. All questions regarding this report should be directed to the TestAmerica Project Manager who has signed this report.

CASE NARRATIVE

Client: ARCADIS U.S., Inc.

Project: Ford TCAP - E200572

Report Number: 240-52525-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 6/26/2015 9:20 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 4.2º C and 5.2º C.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), MB-1 (20150625) (240-52525-9), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 06/29/2015 and analyzed on 07/01/2015.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 240-187301 and analytical batch 240-187606 on these samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), MB-1 (20150625) (240-52525-9), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) .

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)

Samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 07/01/2015, 07/02/2015, 07/08/2015, 07/10/2015 and 07/11/2015 and analyzed on 07/08/2015, 07/09/2015, 07/10/2015, 07/12/2015 and 07/14/2015.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Bis(2-ethylhexyl) phthalate was detected in method blank MB 240-187803/22-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Bis(2-ethylhexyl) phthalate was detected in method blank MB 240-188303/4-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Caprolactam, Di-n-butyl phthalate, Isophorone and Phenol were detected in method blank MB 240-188303/4-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Bis(2-ethylhexyl) phthalate and Di-n-butyl phthalate were detected in method blank MB 240-188799/17-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

2,4,6-Tribromophenol (Surr) failed the surrogate recovery criteria low for HA-25_0-1 (20150624) (240-52525-12).

Bis(2-ethylhexyl) phthalate failed the recovery criteria high for LCS 240-188303/5-A.

Samples HA-27_0-1 (20150625) (240-52525-1)[6.67X], HA-28_0-1 (20150625) (240-52525-2)[4X], HA-29_0-1 (20150625) (240-52525-3) [2X], HA-30_0-1 (20150625) (240-52525-4)[2X], HA-31_0-1 (20150625) (240-52525-5)[6.67X], HA-19_0-0.5 (20150625) (240-52525-6) [2X] and HA-23_0-1 (20150624) (240-52525-10)[2X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

The following samples were diluted due to the nature of the sample matrix: HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4) and HA-19_0-0.5 (20150625) (240-52525-6). Elevated reporting limits (RLs) are provided.

Surrogate recovery for the following sample was outside control limits: HA-25_0-1 (20150624) (240-52525-12). Re-extraction and/or re-analysis was performed outside of holding time with acceptable results. Both sets of data will be reported.

The Method Blank and Laboratory Control Sample (LCS) for batch 188303 associated with samples HA-23_0-1 (20150624) (240-52525-10) recovered outside control limits for Bis-2-ethylhexyl phthalate. Upon re-extraction and re-analysis all QC met acceptance criteria, however, sample holding times had been exceeded. Both sets of data will be reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN GRO

Samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), MB-1 (20150625) (240-52525-9), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) were analyzed for Wisconsin GRO in accordance with Wisconsin DNR Modified GRO. The samples were prepared and analyzed on 06/30/2015.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the Gasoline Range Organics (GRO) mix (i.e., Naphthalene): HA-27_0-1 (20150625) (240-52525-1) and HA-20_0-1 (20150625) (240-52525-7).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

WISCONSIN DRO

Samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) were analyzed for Wisconsin DRO in accordance with Wisconsin DNR Modified DRO. The samples were prepared on 06/27/2015 and 07/02/2015 and analyzed on 06/29/2015, 06/30/2015 and 07/07/2015.

Samples HA-27_0-1 (20150625) (240-52525-1)[5X], HA-28_0-1 (20150625) (240-52525-2)[10X], HA-29_0-1 (20150625) (240-52525-3) [5X], HA-30_0-1 (20150625) (240-52525-4)[5X], HA-31_0-1 (20150625) (240-52525-5)[2X] and HA-19_0-0.5 (20150625) (240-52525-6) [2X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Significant peaks, readily distinguished from background, were detected in the following samples within five minutes after the end of the analytical window defined by the last component eluting in the WIS DRO Mix: HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-23_0-1 (20150624) (240-52525-10) and HA-24_0-1 (20150624) (240-52525-11).

The laboratory control sample duplicate (LCSD) for preparation batch 240-187816 and analytical batch 240-188039 recovered outside

acceptance limits for WI Diesel Range Organics (C10-C28). There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported.

The laboratory control sample duplicate (LCSD) for preparation batch 240-187816 and analytical batch 240-188186 recovered outside acceptance limits for WI Diesel Range Organics (C10-C28). There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported.

The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 240-187816 recovered outside control limits for the following analytes: WI Diesel Range Organics (C10-C28).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL METALS (ICP)

Samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 06/30/2015 and 07/01/2015 and analyzed on 07/01/2015, 07/02/2015 and 07/06/2015.

Magnesium, Nickel and Zinc were detected in method blank MB 240-187368/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Magnesium was detected in method blank MB 240-187589/1-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Zinc was detected in method blank MB 240-187589/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL MERCURY

Samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 06/30/2015 and 07/01/2015 and analyzed on 07/01/2015 and 07/02/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples HA-27_0-1 (20150625) (240-52525-1), HA-28_0-1 (20150625) (240-52525-2), HA-29_0-1 (20150625) (240-52525-3), HA-30_0-1 (20150625) (240-52525-4), HA-31_0-1 (20150625) (240-52525-5), HA-19_0-0.5 (20150625) (240-52525-6), HA-20_0-1 (20150625) (240-52525-7), HA-22_0-1 (20150625) (240-52525-8), HA-23_0-1 (20150624) (240-52525-10), HA-24_0-1 (20150624) (240-52525-11), HA-25_0-1 (20150624) (240-52525-12) and HA-26_0-1 (20150624) (240-52525-13) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 06/27/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DATA REPORTING QUALIFIERS

Client: ARCADIS U.S., Inc. Job Number: 240-52525-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	*	ISTD response or retention time outside acceptable limits
	*	LCS or LCSD is outside acceptance limits.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	F2	MS/MSD RPD exceeds control limits
	E	Result exceeded calibration range.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	H	Sample was prepped or analyzed beyond the specified holding time
	X	Surrogate is outside control limits
GC Semi VOA		
	*	LCS or LCSD is outside acceptance limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	*	RPD of the LCS and LCSD exceeds the control limits
Metals		
	B	Compound was found in the blank and sample.
	F1	MS and/or MSD Recovery is outside acceptance limits.
	4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
